1. Background

This Formal Board determination is made under Clause 77 of the Surveying and Spatial Information Regulation 2017 to enable CPD to be consistently and fairly administered and to assist surveyors to comply with the Board's CPD requirements.

In accordance with Clause 82 of the Surveying and Spatial Information Regulation 2017 a registered surveyor must comply with the requirements of this determination as a condition of registration as a surveyor.

'Continuing Professional Development' (CPD) is defined as 'the process by which a professional surveyor maintains and develops the on-going quality and relevance of his/her professional practice.'

Please note this document is a "living" document and changes will be made to the document from time to time as approved by the Board of Surveying and Spatial Information. The enforcement of changes will commence from a date determined by the Board of Surveying and Spatial Information but as a guide minor changes will commence upon publication of change and major changes will commence in the following CPD year after the change is published.

2. Objectives of Continuing Professional Development

Through the implementation and maintenance of a Continuing Professional Development Determination, the Board of Surveying and Spatial Information of NSW has set a number of objectives for registered surveyors in New South Wales:

- to maintain professional service in surveying at the peak level of competence
- to encourage the sharing of ideas amongst surveyors in common forums
- to improve the quality of surveying services to the community
- to extend an individual's professional knowledge
- to preserve and enhance the high standard of professional performance by surveyors throughout their career
- to increase individual surveyor's capabilities as a contribution to national development
- to encourage relevant Continuing Professional Development activities by employers of professional surveyors as part of their employees' normal duties.

3. Requirements for registered land or mining surveyors

The Board requires surveyors applying for renewal of annual registration to certify that they have met the continuing professional development (CPD) requirements set by the Board for the period prior to renewal. This CPD period is aligned to the financial year, extending from 1 July in one year to 30 June in the following year.

Proof of compliance with the Board's Continuing Professional Development Determination is demonstrated through the surveyor's attainment of CPD 'points'. As a rule, one CPD point is awarded for each hour in attendance at any recognised and assessed CPD activity as detailed in Section 4. This may take the form of a lecture, seminar, workshop, conference or demonstration. Points may also be awarded for the research, preparation and initial presentation of papers at such activities and/or for the publication of technical papers, in accordance with the Board's

CPD Determination.

The Board's requirements for compliance with the Continuing Professional Development Determination for the 2018/2019 CPD Year onwards are:

1. a minimum of 15 points per annum without provision for carry-over of surplus points into the following year
2. for registered land surveyors, at least five NSW specific cadastral points to be included in this minimum of 15 points
3. for registered mining surveyors, at least five NSW specific mining surveying points to be included in this minimum of 15 points
4. the remainder of the 15 points are in 'Survey Practice'.

'Survey Practice' includes survey matters related to:

- technology use related to surveying
- infrastructure and engineering
- environment and planning
- building development
- subdivision development
- project management
- professional practice management
- mine planning and development
- risk management.

All CPD activities are to be assessed by the organisations ratified by the Board for administering the CPD Policy.

Surveyors registered as both land and mining surveyors need only acquire a minimum of 15 points. However, of these points, the surveyor must obtain a minimum of five in cadastral activities and five in mining surveying activities.

For the purpose of CPD assessment, 'cadastral' has been defined as "anything to do with the determination and delimitation of rights and interests of parties in real property". "NSW specific cadastral" may include cadastral points allocated to lectures, workshops etc. dealing with cadastral matters that are deemed by a ratified organization (see Section 5.2) to be relevant to survey practice in NSW. Material dealing with inter-state or international jurisdictions may be assessed as 'survey practice'.

For the purpose of CPD assessment, there is no distinction between cadastral points gained in either NSW or ACT jurisdictions. Refer to the Memorandum of Understanding between BOSSI and the Surveyor General of the ACT.

For the purpose of CPD assessment, 'mining' has been defined as "anything to do with the application of surveying technologies and/or principles in extractive, metalliferous or coal mining industries". "NSW specific mining" may include mining points allocated to lectures, workshops etc. dealing with mining matters that are deemed by a ratified organization (see Section 5.2) to be relevant to survey practice in NSW. Material dealing with inter-state or international jurisdictions may be assessed as 'survey practice'.

For the purpose of CPD assessment, 'Infrastructure and Engineering' has been defined as anything to do with:

- Urban road design; Urban drainage design; Urban contract supervision.
- Rural road design; Rural drainage design; Rural contract supervision.
- Water mains design; Water mains contract supervision.
- Sewer mains design; Sewer mains contract supervision.
- On site detention and drainage design.

For the purpose of CPD assessment, 'Environment and Planning' may include Project Management; Effective Communication, Negotiation and Mediation; Economics of Development; Professional Ethics and Legislation and Governance as included in the Certified Practising Planner course provided by the Planning Institute of Australia.

For the purpose of CPD assessment, 'Risk Management' includes but is not necessarily restricted to areas such as Risk Averse Procedures and Practices, Occupational Health and Safety, Mine Safety Management, Quality Assurance and Professional Liability.

It is strongly emphasised here that each CPD twelve (12) month period ends on 30 June and the required points should have been achieved by this date.

4. CPD activities

Any CPD undertaking should seek to complement and update existing knowledge, enhance skills or prepare a surveyor for additional responsibilities or tasks. Courses and activities must be relevant to the surveyor's immediate or long-term needs, in relation to the practice of surveying.

A surveyor's CPD should relate to the theory and general practice of surveying in its broadest sense. However, content could also include education for, and acquisition of, other skills and related professional practices including business management, environmental management, and professional responsibilities.

Evidence of CPD must be made available to the Board and organisations ratified by the Board for the assessment of compliance with the Board's CPD Determination.

4.1 CPD activities

Acceptable CPD activities include but are not restricted to:

Being a personal member of a professional organisation which issues a professional journal, accruing one CPD point per organisation to a maximum of two 'Survey Practice' CPD points per CPD period.

Attendance, to a total maximum allowable points for all service on all Committees and Sub - Committees of six CPD points per CPD period:

- at a professional surveying organisation's meetings (for example, the Executive Committee of the Association of Consulting Surveyors NSW Inc. or the Board of Directors of the Institution of Surveyors NSW Inc. or the Board of Directors of AIMS - Australian Institute of Mine Surveyors Limited)
- at a professional surveying organisation's sub-committee meetings (for example, the Institution's Survey Practice and Legislative Subcommittee, Mine Survey and Drafting Directions Committee)
- at a professional surveying organisation's annual general meeting
- at technical committee meetings of Local Government or State Government instrumentalities.

Supervising surveyor activities for enrolled, financial, candidates irrespective of the number of candidate surveyors being supervised, for a period of 26 weeks or greater, to a maximum of one 'specialty' and two 'Survey Practice' points per CPD period. Periods of supervision less than 26 weeks will not be allocated any CPD points.

Presentations to pre-tertiary school students on surveying – one point per hour, with a maximum of two points per session and a maximum of four points in each CPD period.

Attendance at ePlan events where assessment of cadastral points will be assessed based upon the content of the event. As a guide, 4 hour ePlan events are to be allocated 0.5 cadastral points and 3.5 survey practice points, and 6 hour ePlan events are to be allocated 1 cadastral point and 5 survey practice points as a minimum.

Attendance at business type breakfast functions (such as Local Chamber of Commerce and Property Developer Meetings) – one point per hour, with a maximum of four points in each CPD period.

4.2 Education

CPD points may also be gained through attendance at CPD events. All such CPD events, activities and courses must be of significant technical, intellectual and practical content and should deal primarily with matters directly relating to the practice of surveying. Presenters of any course must have the appropriate practical experience or academic qualifications in the course subject. Acceptable CPD points may be gained through the following categories:

Conferences, congresses and conventions

These include conferences, congresses or conventions run by professional bodies and which provide subjects of interest and education for surveyors.

Courses, seminars, workshops and lectures

Similarly, these can include those provided by a wide range of organisations including educational bodies, government departments, and private providers.

Institution of Surveyors (etc.) Regional group meetings and discussion

Institution Group meetings should provide a regular opportunity for regional members to gain CPD points. Attendance at these functions is highly recommended.

Development activities

It is recommended that a surveyor submit the proposed program to an organisation ratified by the Board for assessment of CPD points prior to undertaking the activity. Supporting information must outline the content, duration and proposed learning outcomes of the program.

Surveyors must ensure they receive a record of attendance as proof of completion of the activity. Such activities include:

- Structured in-house learning. This type of CPD activity is presented by in-house experts and is common in larger enterprises. It may also be a joint activity conducted by a number of smaller enterprises.
- Structured learning - external provider. These would be similar to structured in-house learning except the provider is external to the enterprise.

Tertiary courses

These are specific education courses delivered by accredited adult vocational, registered training organisation or university institutions. CPD Points are allocated at 1 point per hour of study based upon hours of study recommended by the course provider.

Research and writing of technical publications and presentation of technical paper

This would include preparation of papers published in seminar papers or professional journals. CPD points to be allocated at 1 point per hour of research up to a maximum of 5 CPD points per presentation topic. Presenters must provide acceptable documentary evidence of their attendance at the event they are presenting at to be able to claim points for other presentations at the event, (i.e. claiming full points for attending the whole event).

Self-education

Unsupervised structured self-education (whether by print material or electronic media, including internet, DVD and so on, or any other form of private study) is not encouraged, because of the difficulty of ensuring diversity of content and opinion. Some self-education will be accepted, but it is to be limited to three points and is counted at one point per two hours of study. In special circumstances, including illness, or remoteness, or for surveyors overseas (to help them obtain NSW mining or cadastral points) the limit can be exceeded, but this is regarded as special consideration and requires the approval of BOSSI through an application to the Registrar see Section 8.

Prior to undertaking any self-education activities, a surveyor must submit the proposed program and intended learning outcomes to one of the ratified organisations referred to in Section 5.2, for assessment of CPD points. The ratified organisation approving such activities should be satisfied that there will be education outcomes. BOSSI will accept a ratified organisation's decision whether unsupervised structured self-education attracts CPD points.

Notes

- i) Any completely unstructured self-education, which could extend to such activities as generally searching the internet for surveying material, or reading a book without a prior plan, is not acceptable.
- ii) Activities which provide confirmation of supervision, such as interactive internet based activities, are not regarded as unsupervised self-education, but are limited to a maximum of six (6) CPD points.

4.3 Unacceptable activities

Activities which do not warrant the allocation of CPD points include but are not restricted to:

- unstructured conversations with other surveyors or professionals
- time allocated to lunches and breaks at conferences, workshops, seminars, training courses etc
- general meetings with clients, lawyers, government officers, instrument companies or similar
- unstructured learning of instrument operations
- attending and contributing to community service organisation meetings or local government association (local council) meetings
- marking out a sports oval or similar setting out work for charitable organisations
- ad hoc training of field-hands and assistants

- generic inductions and first aid courses.
- any interviews attended as a condition of applying for restoration to the register
- any interviews attended as a condition of applying for registration via mutual recognition

5. CPD Compliance

5.1 Certification

Surveyors are required to certify, as part of their registration renewal, that they comply with the Board's CPD requirements for renewal of registration. The surveyor's certification shall certify that the required number of CPD points, in the required categories, has been obtained during the relevant CPD period.

5.2 Assessment of CPD points

An organisation ratified by the Board for the assessment of activities and the assignment of CPD points, may:

- Assign CPD points to their own activities.
- Assess any activities of other organisations and assign CPD points accordingly.
- At their discretion, assess any other activities of a surveyor, whether a member or a non-member, and assign CPD points accordingly.

An organisation ratified by the Board shall not assess the activities of another organisation ratified by the Board but shall accept the assessment made by that other organisation of its own activities.

When assigning CPD points, a ratified organization when relevant can identify 'Survey Practice' points as 'Infrastructure and Engineering' or 'Environment and Planning'. This breakdown is to enable an individual to demonstrate CPD in these areas for other interested parties such as Councils. CPD in either 'Infrastructure and Engineering' or 'Environment and Planning' is not mandatory.

The Board shall establish a CPD Committee with representation from organisations ratified by the Board. This committee shall meet regularly, with a particular focus being the development of policy and review of assessments undertaken by the organisations ratified by the Board. In the event of a dispute in the assignment of CPD points between organisations ratified by the Board, the Board shall be the final arbiter.

The five ratified organisations are:

- Institution of Surveyors NSW
- Association of Consulting Surveyors NSW
- Australian Institute of Mine Surveyors Limited
- University of Newcastle and
- Surveying and Spatial Sciences Institute (NSW Region)

The Board may audit those organisations ratified by the Board for the assessment of activities and the assignment of CPD points. This is to provide quality assurance that the process is under control and there is no bias in the assessment procedures between different organisations.

It is emphasised that self-assessed points are not acceptable, all points are to be assessed by a ratified organisation.

5.3 CPD Certificate

Organisations ratified by the Board from time to time may issue CPD Certificates to surveyors certifying the CPD activities undertaken by the surveyor during the CPD year stated on the certificate. The format of this certificate should be similar to the example CPD Certificate included in Appendix A. The Board will accept this Certificate as sufficient and absolute proof of a surveyor's undertaking of the CPD activities as stated on the certificate.

CPD Certificates shall identify the 'specialty' area claimed by the surveyor (for example, cadastral or mining).

Ratified organisations will be required to provide details of certificates issued including name of surveyor, identification number of surveyor, amount of total points in each category that the surveyor has gained, and the date that CPD certificate was issued to the Board at a time and in a format as agreed by the Board and the ratified organisation.

6. Audit

The Board shall audit approximately 50 per cent of surveyors each year. The Board funds this audit. Although this audit is nominally of a random nature, the Board reserves the right to audit members of the surveying profession to the extent where the Board is satisfied that the objectives of the Board's CPD Determination and the requirements of State legislation have been met.

Audit notices will be sent to the selected surveyors after 31 August each year. As the audit is a proof of CPD compliance, the results of the audit for each surveyor shall be recorded in the register.

Surveyors selected for audit are required to provide documentary evidence to support that they have met the Board's CPD requirements for the CPD Year which ended on the 30 June of that year.

The only acceptable documentary evidence for the Board's audit is a CPD certificate issued by an organisation ratified by the Board in a format similar to the CPD certificate included in Appendix A.

Surveyors who fail to demonstrate compliance with the Board's CPD Determination shall be removed from the NSW Register of Surveyors at a date to be determined at the discretion of the Board.

The Audit assessment will take place after 31 August at a suitable time determined by the CPD Audit Panel. Upon completion of the assessment, notification of the results will be sent to audited surveyors.

The Audit Record of a surveyor will be considered before re-enrolment each year and if it is unsatisfactory special conditions may be imposed. These conditions may include attendance at selected CPD activities, an interview, or an examination.

6.1 Restoration

Restoration to the NSW Register of Surveyors involves those surveyors who were previously registered but have been removed from the register either through personal choice or by the Board of Surveying and Spatial Information (for example, non-payment of fees, disciplinary action or non-compliance with the Board's CPD requirements).

The initial re-enrolment of a surveyor applying for restoration will require the certification of CPD points for the CPD period in the year of his/her removal. The surveyor should supply information which would normally be required as part of their application for restoration. If the surveyor cannot provide the information that would normally be required, the surveyor must undertake the appropriate number of CPD activities before the Board will consider the surveyor's application for restoration.

In addition to the above requirement, the surveyor will be subject to an audit on their next re-registration.

When a surveyor is removed from the NSW Register of Surveyors for non-compliance with the Board's CPD Policy the surveyor cannot apply for restoration until such time as satisfactory evidence of compliance for his/ her failed CPD audit year is made available to the Board. Once the surveyor has been restored his or her CPD requirements for the current CPD year would only be for the period that they were actually registered and not for the period of their removal.

For all other restorations the following requirements will be imposed and the surveyor will be audited on their next re-registration

The CPD requirements for a surveyor who has enrolled part way through a CPD year will be as follows:

- if there is nine months or more to run.....full CPD points
- if there is six to nine months to run.....nine points including the five specialist points
- if there is three to six months to run.....six points including the five specialist points
- if there is three months or less to run.....five specialist points.

If there are six months or less to run, any shortage of CPD in the year of enrolment can be accrued as additional points to be gained in the following year and the surveyor will be audited at the end of this following year.

Surveyors who were financial the previous year and missed 31 August surveyors' registration deadline and are therefore required to apply for restoration will still be required to comply with the CPD requirements and will be required to provide the information that would normally be required before being restored to the register.

7. Mutual Recognition

The Board is committed to the maintenance of reciprocity between the various jurisdictions in Australia. If an accredited surveyor from another jurisdiction applies to practise in New South Wales the Board will register that person in accordance with the provisions of the Mutual Recognition Act, 1992 irrespective of any deficiency in CPD points held at that time.

However, the Board shall require all CPD requirements to be satisfied upon renewal of registration. The CPD requirements for a surveyor who has enrolled part way through a CPD year will be as follows:

- if there is nine months or more to run.....full CPD points
- if there is six to nine months to run.....nine points including the five specialist points
- if there is three to six months to run.....six points including the five specialist points
- if there is three months or less to run.....five specialist points.

If there are six months or less to run, any shortage of CPD in the year of enrolment can be accrued as additional points to be gained in the following year and the surveyor will be audited at the end of this following year.

8. Special cases

8.1 Initial registration

The initial New South Wales competency examination process recognised by the Board is construed to satisfy the Board's CPD requirements for that particular CPD period. This means that a surveyor passing their final examination during a particular CPD period is exempt from the CPD requirements for the remainder of that period. In practical terms, this means that a surveyor can tick the CPD compliance box when applying for registration in the CPD year directly after the CPD year which they passed their final examination. For example a surveyor passing their final examination in October or March will be required to comply with the Board's CPD requirements from the following July onwards, (i.e. attend CPD events from the following July onwards).

8.2 Exemptions

Occasionally individual surveyors are unable to satisfy the Board's CPD requirements within the specified period, and the Board will consider on its merits any circumstances where a surveyor has experienced justifiable and genuine hardship. The Board may exempt a surveyor from compliance with all or part of the annual CPD requirements on any compelling grounds that the Board considers justifiable. Any such exemption would apply only for the current period and conditions may be imposed.

For example, the Board may resolve to exempt a surveyor from compliance with CPD requirements for registration on the basis of absence from practice while on extended parenting leave. Applications for exemption must be submitted in writing to the Board for approval. CPD points, to cover any part or all of the deficiency, may be required, after the expiry of the exemption period, at the Board's discretion. A further conditional compliance may be granted to enable the surveyor to achieve the required CPD points.

However, some applications for exemption, commonly based on pressure of business or geographical location, appear to demonstrate a lack of commitment to both CPD principles and the standards expected of professional surveyors in the modern commercial and competitive environment. These applications are not viewed sympathetically by the Board.

8.3 Conditional compliance

The Board may grant a surveyor a conditional compliance, for part of the annual CPD requirements on any compelling grounds that the Board may consider just. Any such conditional compliance would apply only for the current period and conditions are imposed. The surveyor will be required to gain the shortfall of points within the next CPD period and will be audited upon renewal. Applications for conditional compliance must be submitted to the Board for approval

Applications for exemption from full or part compliance with the Board's CPD requirements within the relevant period, or requests for Conditional Compliance, must be received by the Registrar, NSW Board of Surveying and Spatial Information, no later than 31 July. Applications must be in writing and accompanied by any supporting material that will enable the Board to make an informed decision. Subject to the right of appeal detailed in Section 9 of this Determination, a surveyor whose application for either exemption or a conditional compliance is rejected by the Board and who has not achieved the required number of CPD points will be removed from the NSW Register of Surveyors on 1 September. It should be noted that such an application should not be construed as an extension of the CPD period to 1 September, as it is at the Board's discretion to accept or reject an application for exemption or an application requesting conditional compliance.

Organisations ratified by the Board for the assessment of activities and the assignment of CPD points are not permitted to provide a conditional compliance for surveyors to complete their CPD requirements, nor can these organisations exempt a surveyor from complying with the Board's CPD requirements, either in part or in full.

It is strongly emphasized that the relevant CPD period ends on 30 June and the required CPD points should have been achieved by this date.

8.4 Surveyors overseas

The Board encourages registered surveyors who are absent from Australia for an extended period to contact the Board prior to their departure, to discuss the Board's requirements regarding retention of their registration whilst they are overseas. The Board can also provide advice regarding restoration to the register on return to Australia, should a surveyor's registration lapse whilst overseas.

Each application for exemption on the grounds of overseas work or travel will be considered by the Board with regard to the particular circumstances.

General guidelines to assist surveyors to satisfy CPD requirements whilst overseas have been developed by the Board. Further to Section 4 of this Determination, CPD points can usually be accumulated by various methods, such as:

- maintaining membership of a NSW based professional surveying organisation
- providing evidence of competence in local professional practice to the relevant extent
- contact with surveyors and allied professionals and attendance at appropriate congresses, meetings, seminars and discussion groups

- reading any available Australian or overseas publications, journals, technical bulletins etc. with the intention of maintaining contact with professional activities in Australia and overseas
- preparing and presenting papers to professional groups
- preparing and presenting papers on overseas experience to local groups on return to Australia. This method of obtaining CPD points is especially applicable to those working on projects overseas for extended periods e.g. on drilling rigs, major engineering projects or in Antarctica etc.

It should be noted that not all CPD points can be gained by engaging in only one type of activity, for example maintaining membership of a NSW based professional organisation.

Generally surveyors travelling, working or studying overseas may obtain relief from CPD requirements at the discretion of the Board by submission of a documented self-assessment of activities undertaken. The surveyor must satisfy the Board that he/she maintained professional standards and competence whilst overseas.

New South Wales registration should not be withheld from surveyors working overseas for periods spanning more than one year. Although such surveyors may not be able to obtain NSW cadastral and/or mining points during this time, the Board may allow an appropriate exemption to cover these circumstances as long as the surveyor makes application to the Board.

On return to Australia cadastral and/or mining points will be required at the Board's discretion and a conditional compliance may be allowed if necessary to enable the surveyor to accumulate these points.

9. Right of Appeal

Any assessment of non-compliance with the Board's CPD Determination may be considered to be in breach of Section 13 of the Surveying and Spatial Information Regulation 2012. As such, the assessment may be subject to the right of appeal by a surveyor, in accordance with state legislation.
